

INSTRUCTIONS

MODEL AV-130-UCLA2-PS/AVX-SP-4A-UCLA PULSE GENERATOR

S.N.:

WARRANTY

Avtech Electrosystems Ltd. warrants products of its manufacture to be free from defects in material and workmanship under conditions of normal use. If, within one year after delivery to the original owner, and after prepaid return by the original owner, this Avtech product is found to be defective, Avtech shall at its option repair or replace said defective item. This warranty does not apply to units which have been disassembled, modified or subjected to conditions exceeding the applicable specifications or ratings. This warranty is the extent of the obligation or liability assumed by Avtech with respect to this product and no other warranty or guarantee is either expressed or implied.

Note that the output amplitude of the AV-130-UCLA2-PS may be increased by about 35% by removing the 3 db attenuator located in the interior of the AV-130-UCLA2-PS chassis. To access the interior, remove the 4 Phillips screws on the rear panel of the instrument and slide the top cover off. Note, however, that with increased output amplitude the AVX-SP-4A-UCLA1 unit will exhibit a much higher output droop.
